

ABHIJIT PAUL

Senior Product Manager | B2B SaaS & Platform Ecosystems | Product Strategy at Program Scale

Mumbai Metropolitan Region (MMR), India | Open to Relocation | +91-9663800228 | abhpaul@gmail.com | linkedin.com/in/abhpaul
| Notice: 15 Days

PROFESSIONAL SUMMARY

Senior Product Manager with 20+ years of experience — 10 years as a software engineer, 10 years in product and program leadership. Expert in 0-to-1 discovery, product-led growth (PLG), go-to-market (GTM) execution, and scaling complex B2B SaaS ecosystems to multi-million-euro ARR. At Tradebyte (Zalando Group, EUR 10B+), owns the complete product lifecycle across 8 concurrent programs — spanning vision and discovery, productisation, multi-market expansion (DE, BE, NL, CH), compliance (GDPR and SOC 2), and a 30M-orders/month legacy migration executed with zero merchant-impacting incidents. Combines product judgment — pivoting strategy ahead of a commercial inflection point, de-scoping features where ROI didn't justify the effort — with the delivery discipline to scale execution without scaling headcount: a pilot-to-playbook model enabled 33 merchant migrations with no engineering dependency. AI-first practitioner — uses Cursor, Gemini Canvas, and Lovable for product validation, feedback loop design, and engineering collaboration; Duke University AI PM, Human Factors in AI, and ML Foundations certified.

CORE COMPETENCIES

Product Strategy: 0-to-1 Discovery and PLG | OKR-Driven Roadmap | GTM Planning and Execution | JTBD Customer Discovery | Competitive Analysis | Pricing and Packaging

Program & Delivery Leadership: Multi-Program Portfolio Ownership | Strategic Pivot and Scope Governance | Pilot-to-Playbook Scaling | Cross-Functional Team Steering | Executive Stakeholder Alignment

Technical & AI: AI-Assisted Product Validation (Cursor, Gemini Canvas, Lovable) | Marketplace API Ecosystems | Cloud Platforms (AWS / GCP) | Data Pipelines

Governance & Operations: P&L Management and ARR Growth | SOC 2 / GDPR Governance | DORA Metrics and OKR Governance | SLA Management | NPS, Retention and Growth KPIs

PROFESSIONAL EXPERIENCE

Senior Product Manager — *Tradebyte Software GmbH (Zalando Group), Berlin, Germany (Remote)* September 2024 — Present

Product scope and leadership operated at Principal PM level across 8 concurrent programs.

- **0-to-1 Discovery and PLG:** Identified and executed end-to-end product vision for the MFI platform — JTBD interviews with merchants and fulfilment partners, OKR-aligned roadmap across 3 engineering squads (13 engineers, 3 QA, 1 UX designer). Outcome: 1,500+ daily orders in production week one; EUR 3M+ projected ARR; merchant activation time reduced 40%.
- **Multi-Program Portfolio at Scale:** Concurrently owned 8 programs — platform productisation, EU market expansion (DE, BE, NL, CH), returns, shipping, GDPR, SOC 2, AWS financial pipeline, and a 30M-orders/month legacy migration — with no PM layer below. Maintained OKR-aligned roadmap governance across all tracks with zero critical slippages.
- **Revenue Strategy, Pricing and GTM:** Defined pricing and packaging for fulfilment-as-a-service B2B SaaS, building new ARR from EUR 0 to EUR 25,000/month per merchant. Delivered GTM for TikTok Shop DE as first-to-market social commerce integration, then de-scoped a parallel workstream after ROI analysis showed only 2-3 merchants would benefit.
- **Strategic Pivot Judgment:** Identified the About You/Zalando merger as a market inflection point making MFI architecture redundant — brought a structured recommendation to CPO, CEO, and VP Product to pivot to ZFI before it became a commercial crisis. Outcome: zero commercial disruption; engineering reallocated to highest-ROI features.
- **Scalable Execution — Pilot to Playbook to Ops:** For the 30M-orders/month migration (33 merchants), designed a three-phase model: engineering-led pilot, playbook creation, then Ops-led bulk migration. Outcome: ZFI scaled 300x; zero merchant-impacting incidents; Ops self-sufficient with no engineering dependency.
- **Market Expansion and Compliance:** Governed onboarding and SLAs for 5 global marketplace partners (Amazon, Zalando, Otto, AboutYou, Bol.com) across 4 EU markets, cutting partner activation from 5-7 days to under 15 minutes. Ran GDPR across three parallel workstreams and mapped control overlap into SOC 2 Type I, achieving audit-readiness in a single quarter with zero material findings.
- **AI-Assisted Validation:** Used Cursor, Gemini Canvas, and Lovable for product hypothesis testing, feedback loop design, and sharing validated concepts with engineering — reducing discovery-to-validation cycles by 60%.

Product Owner — *Signa Sports United GmbH, Berlin, Germany (Remote)* September 2022 — April 2024

- Led 0-to-1 logistics platform discovery across 4 EU/UK markets — JTBD workshops with warehouse operators and e-commerce managers, competitive analysis, and routing logic optimisation that improved on-time delivery KPIs by 24 hours and lifted customer NPS. Owned SLA governance and product relationships with warehouse partners.

Career note: April – September 2024 — AI Product Management, Managing ML Projects, Human Factors in AI, ML Foundations (Duke University); PM Certification (CareerFoundry, Berlin).

Product Owner — *Upland Software, Remote (USA)*

June 2021 — September 2022

- Led a PLG platform launch that drove a 50% increase in customer self-service rates. Built the team's first OKR-aligned Scrum framework, improving R&D productivity by 30%.

Technical Product Manager — *Crossover for Work, Remote (USA — EU timezone)* March 2018 — December 2020

- Owned GTM and migration strategy for an AWS cloud platform re-architecture, reducing OpEx by 25%. Owned the product roadmap across 80+ platform components.

Senior Technical Product Manager — *General Electric, Bengaluru and Mumbai, India* November 2016 — March 2018

- Led 0-to-1 discovery and GTM planning for an AI-driven predictive maintenance product across a multi-site programme (10-50 stakeholders), delivering a measurable shift from reactive to proactive, data-led operations. Ran C-suite roadmap reviews throughout.

Lead Analyst — *General Electric (GE Capital), Bengaluru and Mumbai, India* November 2013 — November 2016

- Supported cross-site technical program delivery within GE Capital, building the operational and analytical foundation later applied to GE Oil & Gas's predictive maintenance program.

EARLY CAREER — SOFTWARE ENGINEERING FOUNDATION (10 YEARS)

Module Lead, Mindtree (May 2010 – Nov 2013) — Healthcare platform; CI/CD; defects reduced 20%. | **Senior Software Engineer, Wipro** (Jan 2008 – May 2010) — Enterprise platform; integration test cycle reduced 15%. | **Software Engineer, Infosys** (Aug 2005 – Dec 2007) — Java enterprise solutions; promoted within 2.5 years.

EDUCATION

MBA, Project Management Specialization — Sikkim Manipal University (Department of Distance Education) | 2012
B.Tech, Computer Science and Engineering — NERIST, Arunachal Pradesh | CGPA 4.20/5.00 | 2005

PORTFOLIO — PUBLIC AI PROJECT

Job Kit Agent — AI-powered job application agent | 94% TypeScript | Live on Vercel

Live: job-kit-agent-nu.vercel.app | GitHub: github.com/abhpaul-personal/ai-job-application-agent

Built 0-to-1 using a PM-led delivery model: authored a full PRD, sequenced six build milestones, and delegated implementation to Claude Code with human review at every checkpoint. Core architecture: TypeScript (94%), Claude as the LLM reasoning engine, schema-validated outputs, and a human-gated fit analysis before any application kit is generated.

CERTIFICATIONS

Microsoft Program Management Professional Certificate (In Progress) — Microsoft via Coursera | 2026

AI Product Management, Human Factors in AI, Managing ML Projects, ML Foundations — Duke University | 2024

Senior Product Manager Certification — micro1 (AI-Evaluated) | Dec 2024 • Product Management Certification — CareerFoundry, Berlin | 2024

Introduction to Generative AI — Google Cloud Training | Dec 2023 • AWS Certified Cloud Practitioner Exam Training — Udemy | 2023

Advanced Certified Scrum Product Owner (A-CSPO) — Scrum Alliance | Jan 2021 • PRINCE2 Practitioner — PeopleCert / Axelos | Aug 2018

TECHNICAL SKILLS & TOOLS

Product Tools: Jira, Confluence, Aha!, Figma, Miro, ProductBoard

Analytics & Research: Google Analytics, Looker, SQL, A/B Testing, RICE, JTBD, Custom Dashboards

AI & Prototyping: Cursor, Gemini Canvas, Lovable, Generative AI, AI-Assisted Product Validation, Feedback Loop Design

APIs & Cloud: REST APIs, Marketplace APIs (Amazon SP-API, Zalando, Otto, Bol.com, TikTok Shop), AWS (S3, EC2), GCP, Microservices

Methodologies: SAFe, Scrum, OKRs, PLG, GTM, JTBD, RICE, Competitive Analysis, NPS, Activation Funnel, DORA Metrics, GDPR, SOC 2
