ABHIJIT PAUL

Senior Product Leader, Platforms and Integrations

Mumbai Metropolitan Region (MMR), India | Open to Relocation | +91-9663800228 | abhpaul@gmail.com | linkedin.com/in/abhpaul | Available Immediately

SUMMARY

Product leader with 8 to 10 years of product leadership and 8 years of software engineering underneath it, most recently at Tradebyte Software GmbH, part of the Zalando Group, reporting to the CPO from initial vision through execution across 8 concurrent product tracks. Built two platforms from a blank roadmap to production: MFI, which now processes about 200,000 orders a day across 5 global enterprise partners including Amazon and Zalando, worth over EUR 3.65 million in ARR with zero SLA breaches, and ECOSYSTEMS, a B2B SaaS app store with an API documentation portal and developer self-service. I own the API and integration side at scale as well, including REST API contract governance, idempotency design, and circuit-breaker patterns that cut errors by 94% across 5 global enterprise integrations running in mission-critical production. Claude and Cursor are my daily tools, and I built Job Kit Agent on my own time, a live production agentic AI application with LLM orchestration and human-in-the-loop gating.

CORE COMPETENCIES

- Product leadership: 0 to 1 platform ownership, roadmap and strategy, RICE prioritization, JTBD customer discovery, competitive analysis, go-to-market, and executive stakeholder management.
- Platform and API: REST API contracts, interface versioning, schema validation, idempotency, circuit-breaker design, developer experience, partner ecosystem, SOC 2, GDPR, and AWS.
- Delivery: sprint planning, backlog refinement, DORA metrics, A-CSPO, PRINCE2, Jira, Confluence, and Looker.

EXPERIENCE

Founding Product Manager (Advisory, Part-time) | ZuPick *Aug 2026 – Oct 2026 | Remote, India*

- Part-time, non-exclusive, non-cash advisory work, fully compatible with full-time employment, with no overlap outside ZuPick's own consumer AI shopping domain. Drive product strategy, roadmap, and discovery for a platform live with 70,000 or more app downloads and close to 2,000 weekly active users, using Google Analytics, Vercel Analytics, and Notion for user behaviour tracking and roadmap management.

Senior Product Manager | Tradebyte Software GmbH (Zalando Group) *Sep 2024 – Aug 2026 | Remote (Germany)*

- Led MFI, the Multi-channel Fulfilment Integrator, from a blank roadmap to about 200,000 orders a day across 5 global enterprise partners: Amazon, Zalando, TikTok Shop, Otto, and Bol.com. Also owned Multi-Channel Returns, Multi-Channel Shipping, and EU expansion into Germany, Belgium, the Netherlands, and Switzerland. Reported to the CPO from initial vision through execution, then to VP Product as the programme scaled across 8 concurrent tracks.
- Wrote the requirements and built the prototype for an AI-assisted step in the MFI Back Office that matches a brand's product data to the fulfilment service's fields. A person approves the suggested matches, and items with no match go to a manual list that can be sent back to the merchant. Our central AI/ML team handled the model build and execution, and the feature ran in production.
- Owned API and integration governance end to end, including REST API contracts, idempotency design built on a Marketplace ID plus Order UUID composite key, and a circuit breaker with a 5% sliding window that cut errors by 94%. Built a self-service, page-by-page onboarding flow in the MFI Back Office that lets Customer Success and Support connect a merchant to fulfilment in about 15 minutes at best, against 5 to 7 days at best before, with no engineers keying in data. Piloted it with volunteer merchants, wrote the handbook, and migrated 33 merchants onto the platform with zero cutover incidents.
- Built ECOSYSTEMS, a B2B SaaS app store, from 0 to 1, covering the partner marketplace, an API documentation portal, developer self-service integration, partner onboarding flows, and ecosystem health KPIs, all built from scratch.
- Delivered SOC 2 Type I with zero findings in a single quarter, along with GDPR, IAM, RBAC, and audit logging, backed by an AWS S3 data pipeline. Tracked DORA metrics and ran a WBR, MBR, and QBR reporting cadence to the CPO, CEO, and VP Product, across 3 engineering squads totalling 13 engineers, 3 QA, and 1 UX.

Product Owner | Signa Sports United GmbH *Sep 2022 – Apr 2024 | Berlin, Germany (Hybrid)*

- Led platform product across 4 EU markets, covering API integrations, partner ecosystem, carrier routing, SLA governance, and sprint ceremonies. Improved on-time delivery by 24 hours and lifted NPS.

Between roles, from April to September 2024, completed AI Product Management, Managing ML Projects, and Human Factors in AI at Duke University, plus a PM certification at CareerFoundry, Berlin.

Product Owner | Upland Software *Jun 2021 – Sep 2022 | Remote (USA)*

- Owned the backlog for RightAnswers, an enterprise knowledge-management platform, writing user stories and running sprint ceremonies. Improved self-service by 50% and R&D productivity by 30%.

Lead Business Analyst | Hexaware Technologies *Feb 2021 – Jun 2021*

Technical Product Manager | Crossover for Work *Mar 2018 – Dec 2020 | Remote (USA)*

- Led B2B SaaS platform product covering workflow automation, API governance, observability, and reliability. Reduced OpEx by 25%.

Lead Analyst / Sr. Technical Product Manager | General Electric (GE Capital and GE Oil & Gas)*Nov 2013 – Mar 2018 | Bengaluru & Mumbai, India*

- Led enterprise platform product at Fortune 10 scale, covering JTBD discovery, cross-functional delivery, risk management, and executive stakeholder communication.

PORTFOLIO: PERSONAL PROJECT

- Job Kit Agent, a live agentic AI application built on my own time, 94% TypeScript and in production on Vercel at job-kit-agent-nu.vercel.app, with code at github.com/abhpaul-personal/ai-job-application-agent. Covers LLM orchestration, schema-validated outputs, human-in-the-loop gating, and agentic workflow design, built PM-style from a PRD through six milestones using Claude Code, with human review at every checkpoint.

EARLY CAREER: ENGINEERING FOUNDATION (8 YEARS)

- Module Lead, Mindtree, May 2010 to November 2013. Healthcare platform, Java/J2EE, REST APIs, CI/CD.
- Sr. Software Engineer, Wipro, January 2008 to May 2010. Enterprise platform, distributed systems.
- Software Engineer, Infosys, August 2005 to December 2007. Java/J2EE engineering, promoted within 2.5 years.

EDUCATION

- MBA, Project Management Specialization, Sikkim Manipal University, Department of Distance Education, 2012.
- Bachelor of Technology, Computer Science and Engineering, NERIST, Arunachal Pradesh, CGPA 4.20 out of 5.00, 2005.

CERTIFICATIONS

- Microsoft Program Management Professional Certificate, in progress, Microsoft via Coursera, 2026.
- AI Product Management, Human Factors in AI, and Managing ML Projects, Duke University, 2024.
- Introduction to Generative AI, Google Cloud Training, December 2023. AWS Certified Cloud Practitioner Exam Training, Udemy, 2023.
- Advanced Certified Scrum Product Owner, A-CSPO, Scrum Alliance, January 2021. PRINCE2 Practitioner, PeopleCert and Axelos, August 2018.

TECHNICAL SKILLS AND TOOLS

- AI, used daily: Claude, Cursor, Gemini Canvas, agentic AI, LLM orchestration, human-in-the-loop design, schema validation.
- Platform and API: REST APIs, interface versioning, idempotency, circuit breaker, AWS including S3, EC2, Lambda, IAM, and CloudWatch, SOC 2, GDPR, RBAC.
- Product tools: Jira, Confluence, Notion, Aha!, Figma, Miro, Looker, Google Analytics, Vercel Analytics, RICE, OKR roadmaps, and DORA metrics.
