PROFESSIONAL EXPERIENCE

Senior Product Manager | Tradebyte Software GmbH (Zalando Group) | September 2024 — Present
Berlin, Germany (Remote)

Note: Title held is Senior Product Manager; scope operated at Principal PM/TPM level across 8 concurrent programmes.

- 0 to 1 Product Ownership:** Worked directly with CPO from vision and business case through execution for MFI — JTBD discovery, OKR roadmap across 3 squads, activation funnel tracking via Looker and Google Analytics. EUR 3M+ projected ARR, 40% activation improvement, 1,500+ daily orders in production week one.
- Engineering Execution:** Sprint planning, backlog refinement, and release coordination across 3 engineering squads (13 engineers, 3 QA, 1 UX). BDD/Gherkin acceptance criteria written tight enough engineers ran without back-and-forth. Worked directly with engineering on circuit breaker design — 94% reduction in transient network errors.
- Programme Governance:** 8 concurrent tracks, zero slippages, zero surprise escalations to CPO, CEO, or VP Product. RAID registers, DORA metrics, and WBR/MBR/QBR governance maintained across all tracks simultaneously.
- Strategic Judgment:** Identified About You/Zalando merger as a market inflection point — brought structured ZFI pivot recommendation to CPO, CEO, and VP Product before it became a commercial crisis. De-scoped TikTok Shop after ROI analysis showed insufficient merchant base — preserving squad capacity for higher-value launches.
- Market Expansion and Compliance:** EU expansion across DE, BE, NL, and CH including Swiss customs data gap resolution across five system layers. Pilot-to-playbook model enabling 33 enterprise teams to self-operate — 300x scale, zero incidents. SOC 2 Type I zero findings, GDPR, AWS S3 financial pipeline automation.
- Scalable Delivery and API Platform:** Governed REST API contracts, interface versioning, idempotency design, and circuit breaker patterns for 5 global enterprise integrations. ZFI scaled 300x, legacy decommissioned, Operations self-sufficient.
- AI-Assisted Delivery and ECOSYSTEMS:** Claude, Cursor, Gemini Canvas, and Lovable daily for discovery, PRD drafting, and prototype validation. Currently leading ECOSYSTEMS — 0 to 1 Internal Developer Portal with B2B SaaS App Store and API documentation portal.
